Family Services

Empower families and enhance child development

Our Family Services module oversees the efficient management of kindergartens, childcare centres, and third-party providers for streamlined child registration.

This module offers a comprehensive solution, seamlessly handling the entire process involving children, parents, and guardians. Moreover, it provides an inclusive approach by allowing parents or guardians to actively participate in the registration process.

- **Versatile payment management for parents and guardians:** Experience hassle-free payment management tailored to parents and guardians, offering flexibility and convenience.

- **Seamless integration with GIS and property systems:** Our system integrates seamlessly with Geographic Information Systems and property databases, ensuring precise distinction of priority access and zoning for child registration.

- **Attendance assessment with comprehensive tracking management:** Track attendance with meticulous detail and access in-depth reports, providing a comprehensive overview of child participation.

- **Efficient carer note management:** Manage carer notes with efficiency and precision, ensuring effective communication and record-keeping.
